## About This Report

State Mineral Summaries provides information addressing mineral sales volume, revenue collections, revenue disbursements, lease numbers, lease acreage, and cooperative audit program collections and expenditures for Federal and American Indian mineral leases in each of the 50 States. The Minerals Management Service (MMS) Minerals Revenue Management (MRM) program distributes the report annually to Congressional, Federal, State, American Indian, and industry representatives.

Some information in this report necessarily includes estimated data that may change after publication. Numbers in parentheses may include current year collections, credits, and prior-year adjustments.

### ***Mineral Lease Revenues***

The report addresses four types of mineral lease revenues: bonuses, rents, minimum royalties, and royalties.

- **Bonuses** — Leases issued in areas known or believed to contain minerals are awarded through a competitive bidding process. Bonuses represent the cash amount successfully bid to win the rights to a lease.
- **Rents** — A rent schedule is established at the time a lease is issued. Rents are annual payments, normally a fixed dollar amount per acre, required to preserve the rights to a lease.
- **Minimum Royalties** — A Federal lease may further contain a minimum royalty provision. Minimum royalty is the annual payment, on a per-acre basis, required to maintain the rights to a lease until production exceeds a minimum value. Once annual production exceeds the minimum value, minimum royalty payments cease.

Minimum royalties are included under the entry "Other Revenues" in this report. "Other Revenues" also includes settlement payments, gas storage

fees, estimated payments, recoupments, and fees for sand and gravel used for beach restoration.

- **Royalties** — A royalty is due when production begins. Royalty payments represent a stated share or percentage of the value of the mineral produced. The royalty may be an established minimum, a step-scale, or a sliding-scale. A step-scale royalty rate increases by steps as the average production on the lease increases. A sliding-scale royalty rate is based on average production and applies to all production from the lease.

### ***Revenue Collections and Disbursements***

Revenues collected from mineral leases on Federal lands are distributed to States, to the U.S. Department of the Treasury (Treasury), and to a number of designated special-purpose accounts administered by Federal agencies, depending on the land category and the applicable law involved. The Bureau of Indian Affairs (BIA) disburses revenues collected from American Indian leases to the appropriate American Indian Tribes and allotted tract mineral owners.

Royalty payment are generally due on the last day of the month following the month of production, unless that day falls on a weekend or holiday. Payments are then due on the first business day of the following month. Since revenues collected in one month are disbursed in the following month, collection totals will not equal disbursement totals in a given year.

Since 1983, MMS has generally disbursed mineral revenues derived from leases on public domain lands and shared with the States in the month following receipt of the payment. Disbursements are made under the provisions of section 104 of the Federal Oil and Gas Royalty Management Act of 1982 (FOGRMA) which amended the revenue disbursement provisions of the Mineral Leasing Act of 1920 (MLA), 30 U.S.C. 191. The MMS deposits American Indian revenues in accounts administered by the Office of Trust Funds Management (OTFM)

where they are invested and subsequently distributed to American Indian Tribes and individual American Indian lessors by BIA.

The MMS administers mineral leases from different land categories. Legislation and regulations govern formulas for the disbursement of revenues from these leases.

- **Offshore Lands** — Royalty, rent, and bonus revenues from Federal offshore mineral leases on the Outer Continental Shelf (OCS) are deposited to the General Fund of the Treasury through miscellaneous receipts. Under other applicable laws, specified amounts from total offshore revenues are transferred to the Land and Water Conservation Fund (LWCF).

The LWCF, primarily administered by the National Park Service, provides revenues for the Federal Government, State governments, and local governments to purchase parks and recreation areas and to plan, acquire, and develop land and water resources for recreational use. Federal offshore mineral leasing provides approximately 70-90 percent of LWCF revenues.

The National Historic Preservation Fund (NHPF), administered by the National Park Service, is designed to expand and accelerate historic preservation plans and activities. The annual funding authorization of \$150 million to NHPF expired at the end of Fiscal Year (FY) 1997. Legislation authorizing resumption of the \$150 million annual funding for NHPF was passed in FY 2000.

Section 8(g) of the Outer Continental Shelf Lands Act (OCSLA) Amendments of 1978 provided that the States were to receive a "fair and equitable" division of revenues generated from the leasing of lands within 3 miles of the seaward boundary of a coastal State containing one or more oil and gas pools or fields underlying both the OCS and lands subject to the jurisdiction of the State.

The States and the Federal Government, however, could not reach agreement concerning the meaning

of the term "fair and equitable." Revenues generated within the 3-mile boundary were placed into an escrow fund beginning in August 1979. Revenues from the Beaufort Sea in Alaska were placed in a second escrow fund under section 7, beginning in December 1979.

Congress resolved the dispute over the meaning of "fair and equitable" in the OCSLA Amendments of 1985, Public Law 99-272. The law provides for the following distribution of section 8(g) revenues to the States:

- Disbursement of escrow funds in FY 1986-87;
- A series of annual settlement payments disbursed to the States over a 15-year period from FY 1987 to FY 2001; and
- Recurring annual disbursements of 27 percent of royalty, rent, and bonus revenues received within each affected State's 8(g) zone.

Congress passed a second law, Public Law 100-202, permitting distribution of \$322.9 million in section 7 Beaufort Sea escrow funds to Alaska in FY 1988. Nearly \$108.5 million in Federal offshore revenues was released to seven States during FY 2000.

- **Public Domain Lands** — The majority of Federal lands are in the public domain. Under section 35 of MLA, States other than Alaska, receive 50 percent of all royalties, rents, and bonuses collected from any public domain leases located within their respective boundaries.

Forty percent of remaining mineral revenues is deposited in the Reclamation Fund administered by the Bureau of Reclamation. The Reclamation Fund provides revenues to build, maintain, and operate water and associated power projects on arid and semiarid Western lands. Federal onshore mineral leasing provides approximately 40-50 percent of Reclamation Fund revenues.

The remaining ten percent of mineral revenue from public domain leases is directed into the General

Fund of the Treasury through miscellaneous receipts.

Alaska receives 90 percent of all royalties, rents, and bonuses paid for mineral production on public domain leases in Alaska.

The State also receives 50 percent of all royalties, rents, and bonuses generated from the National Petroleum Reserve Alaska.

- **Acquired Lands** — The MMS collects all royalties, rents, and bonuses from leases issued under the Mineral Leasing Act for Acquired Lands of 1947, 30 U.S.C. 351 *et seq.*, on behalf of a number of Federal agencies. Revenues are disbursed according to laws applicable to the lands.

Seventy-five percent of mineral receipts from leases on acquired lands within a national forest administered by the U.S. Department of Agriculture is distributed to the General Fund of the Treasury. The remaining 25 percent is distributed to the State in which the lease is located.

Seventy-five percent of mineral revenues from leases on acquired lands within a national grassland administered by the U.S. Department of Agriculture is distributed to the General Fund of the Treasury. The remaining 25 percent is distributed to the county in which the lease is located.

Seventy-five percent of mineral receipts from acquired Flood Control Act lands administered by the U.S. Army Corps of Engineers is distributed to the State in which the lease is located. The remaining 25 percent is distributed to the General Fund of the Treasury.

Mineral revenues derived from leases on acquired National Wildlife Refuge lands are shared with the county in which the lease is located, according to one of three alternative formulas prescribed by statute. The remainder is deposited in the General Fund of the Treasury.

All mineral receipts generated from leases on acquired reclamation project lands are paid to the Reclamation Fund administered by the Bureau of Reclamation.

Mineral revenues collected from leases on acquired military lands issued before 1981 are deposited in the General Fund of the Treasury. Revenues collected from mineral leases on acquired military lands issued beginning January 1, 1981, are disbursed in the same manner as revenues from public domain leases.

Receipts from other acquired lands are deposited in a general Treasury account.

- **American Indian Lands** — The BIA collects bonuses and rents from nonproducing leases. The MMS disburses mineral royalties and rents from producing American Indian Tribal and allotted leases to OTFM. The BIA subsequently makes disbursements to Tribes and to individual American Indian lessors, with the following exceptions:

- Oil and gas payments to four Tribes—the Jicarilla Apache, the Blackfeet, the Navajo Nation, and the Southern Ute—are made directly by the lease payor to financial institutions contracted by the Tribes to receive their mineral payments.
- The BIA has authorized payors to make direct payments to selected individual American Indian lessors.
- The Osage Nation manages all mineral leases on its Tribal lands and collects its own mineral receipts.
- Solid mineral royalties are paid directly to the applicable Tribes or to a designated BIA office.

- **Alaska Native Lands** — Payments to the Cook Inlet Region, Inc., in Alaska on behalf of Alaskan Natives for the interests the Region holds in several former Federal leases, are made directly by lease payors to the corporation.

## ***Producing and Nonproducing Leases***

Lease and acreage totals in this report represent both producing and nonproducing mineral leases within State boundaries or offshore areas. The totals include leases for Federal offshore, Federal onshore, and American Indian lands.

## ***Cooperative Audit Agreements***

The MRM maintains cooperative agreements that provided audit funding in FY 2000 to 7 American Indian Tribes and 10 States under the authority provided in sections 202 and 205 of FOGRMA. Cooperative audit agreements under section 202 were in effect at the end of FY 2000 with the following Tribes:

- |                        |                    |
|------------------------|--------------------|
| - Blackfeet            | - Southern Ute     |
| - Jicarilla Apache     | - Northern Ute     |
| - Navajo Nation        | - Ute Mountain Ute |
| - Shoshone and Arapaho |                    |

Cooperative agreements under section 205 were in effect in FY 2000 with the following States:

- |              |                |
|--------------|----------------|
| - California | - North Dakota |
| - Colorado   | - Oklahoma     |
| - Louisiana  | - Texas        |
| - Montana    | - Utah         |
| - New Mexico | - Wyoming      |

The cooperative agreements with the Navajo Nation, California, Colorado, Montana, New Mexico, North Dakota, Utah, and Wyoming include audits of geothermal steam, coal, and other solid mineral leases, including phosphate, potassium, and sodium.

The cooperative agreements with California, Louisiana, and Texas include the audit of royalties from offshore leases issued under section 8(g) of the OCSLA Amendments of 1985. The MRM maintained an unfunded Memorandum of Understanding with Alaska and with the Assiniboine Sioux Tribe to share audit information in FY 2000.

This report includes revenues collected from cooperative State and Tribal agreement lease audits in FY 2000. The report further includes Federal expenditures to States and Tribes to fund the cooperative agreements during the year. Many lease audits require more than 1 year to complete. It is subsequently difficult to draw meaningful comparisons between collections and expenditures for a single year.

## ***Graphics Presentation***

A series of graphs are provided at the beginning of this report to summarize Federal and American Indian mineral information on both a national and State level. Specific information for each State is addressed in the individual State tables.

## Products and Units of Measurement

<u>Product</u>	<u>Unit of Measurement</u>
Amethyst . . . . .	Grams
Carbon Dioxide . . . . .	Mcf (thousand cubic feet)
Coal . . . . .	Short tons (2,000 pounds)
Copper . . . . .	Short tons
Garnet Gem . . . . .	Kilograms
Gas . . . . .	Mcf
Gas Plant Products . . . . .	Gallons
Geothermal Steam and Hot Water . . . . .	Millions of British thermal units
Helium . . . . .	Mcf
Nitrogen . . . . .	Mcf
Oil . . . . .	Barrels (42 U.S. gallons)
Phosphate . . . . .	Short tons
Potash . . . . .	Short tons
Quartz Crystals . . . . .	Pounds
Sand and Gravel . . . . .	Short tons
Sodium . . . . .	Short tons
Sulfur . . . . .	Short tons
All Other Solid Minerals . . . . .	Short tons

NOTE: Sulfur is reported as either a fluid or solid mineral based on the method of extraction. Fluid mineral sulfur is produced by extracting the product from the oil and gas stream. All onshore sulfur and a limited amount of offshore sulfur are currently produced from the oil and gas stream. Solid mineral sulfur is extracted using the Frasch process. The majority of offshore sulfur is produced using the Frasch mining method.

Sodium product figures include sodium borate and carbonate compounds.

Copper, reported in pounds, and sulfur, reported in long tons, have been converted to short tons in this report.

NOTE: Boundaries for offshore State areas have not been legally defined beyond the area identified in section 8(g) of the Outer Continental Shelf Lands Act Amendments of 1985, Public Law 99-272. Beginning in Fiscal Year 1996, revenues from new offshore leases issued in the Gulf of Mexico beyond the section 8(g) boundaries will be listed in this report under "Gulf of Mexico." Revenues from leases issued within each State's 8(g) zone and leases previously identified with a particular State will continue to be listed under that State.

## Disbursements to Districts and Island Territories under U.S. Administration

### Disbursements to American Samoa from Outer Continental Shelf Funds (Total since 1978)

Land and Water Conservation Fund Grants . . . . .	\$ 920,817

<b>Total . . . . .</b>	<b>\$ 29,054,237</b>

## Appendix

### Inch-Pound/Metric Conversion

Measurements in this report use English (inch-pound) units. Federal and industry organizations are moving toward International System Units, often referred to as metric units. This appendix provides factors for converting measurements to inch-pound or metric units. To obtain the metric equivalent, multiply the inch-pound unit by the conversion factor. To obtain the inch-pound equivalent, multiply the metric unit by the conversion factor.

<b>To convert from inch-pound unit</b>	<b>Multiply by</b>	<b>To equal metric unit</b>
acre . . . . .	0.4047 . . . . .	hectare
barrel (42 U.S. gallons) . . . . .	0.1589 . . . . .	cubic meter
barrel (42 U.S. gallons) . . . . .	0.136 . . . . .	metric ton

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering sound use of our land and water resources; protecting our fish, wildlife, and biological diversity; preserving the environmental and cultural values of our national parks and historical places; and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to ensure that their development is in the best interests of all our people by encouraging stewardship and citizen participation in their care. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.

As a bureau of the Department of the Interior, the Minerals Management Service's (MMS) primary responsibilities are to manage the mineral resources located on the Nation's Outer Continental Shelf (OCS), collect revenue from the Federal OCS and onshore Federal and American Indian lands, and distribute those revenues.

Moreover, in working to meet its responsibilities, the **Offshore Minerals Management Program** administers the OCS competitive leasing program and oversees the safe and environmentally sound exploration and production of our Nation's offshore natural gas, oil and other mineral resources. The MMS **Minerals Revenue Management Program** meets its responsibilities by ensuring the efficient, timely and accurate collection and disbursement of revenue from mineral leasing and production due to American Indian tribes and allottees, States and the U.S. Treasury.

The MMS strives to fulfill its responsibilities through the general guiding principles of: (1) being responsive to the public's concerns and interests by maintaining a dialogue with all potentially affected parties and (2) carrying out its programs with an emphasis on working to enhance the quality of life for all Americans by lending MMS assistance and expertise to economic development and environmental protection.
